

Katy Gideon Program Helps Kids

Katy Gideon has effective Reading, Writing and Math programs to help inspire kids give their best while approaching TAKS and preparing themselves for later grades where more solid reading and writing skills are required to become self sufficient.

KATY: A program that helps children catch up, keep up, and stay ahead. From New York to California, Gideon centers are providing the tools for academic success focusing on remedial, foundational or enrichment work.

The Katy Gideon program is designed to provide mastery learning in math, reading comprehension and effective writing skills. Building confidence and developing focus step-by-step, Gideon centers create a solid foundation for all children pre-K to the 8th grade.

Highlights of Katy Gideon Program: Individual student attention, Teaching strategies for comprehension, solving math problems, Improving critical and logical thinking, Highly qualified, certified and professional teachers, Well structured curriculum Weekly booklets with daily homework are part of the program. Katy Gideon started in last November with 6 students and has 60 students as of today. Katy Gideon also focuses on TAKS test. Katy Gideon conducted "Gideon TAKS benchmark" test this February. This helped students build their confidence for their real TAKS test in their school. Katy Gideon has

got 95% of the students secured 100% score in both Math & Reading.

Over 14 students have improved their writing skills having joined an affordable Effective Writing program launched September.

If your prereader has trouble learning his letter names and sounds or guesses at words instead of sounding them out, then the Gideon Learning to Read program is for you and your child. Beginning with the consonants, this program teaches not just letter recognition, but the sounds of the letters as well.

Learning to read means breaking the alphabetic code. Our Word Builder booklets provide a step-by-step program with ample practice that allows the student to combine phonetic sounds to decode words.

The Dolch sight words are included in this program. Since these words are studied in kindergarten and first grade, children who master them have a good foundation for beginning reading.
